(54) ATTENDING LEAVING CONTROL SYSTEM

(57)Abstract:

PURPOSE: To collect attending leaving data with a high reliability by describing and expressing fixed control information and non-fixed control information with a bar code in an ID card.

CONSTITUTION: When an attending employee inserts an ID card 2a into a reading device 1a, an employee number, a date and time are sent through a telephone line to a collecting device 5. When the employee works overtime, the card 2a is inserted into the device 1a, an MC code book 4 is opened and a page equivalent to the overtime work for 2hr is opened. When the bar code equivalent to 2hr is read by a bar code reader 3a, the data are sent to the device 5 together with the employee number from the device 1. Thus, the attending leaving control data from devices 1aW1n of respective places are sent to the device 5 and the recording is executed to an FD 6. As the result, the attending control can be executed with a keyboard 7b and a printer 7c.
